

What You **WANT!**

JohnBean

Customer Satisfaction with Wheel Clamps

Some customers know their vehicle's wheels like the back of their hand. They will notice any scratch, scuff, or smudge that appears on the wheel. When performing a wheel alignment, technicians must be very careful when clamping targets onto wheels, especially expensive ones.

With John Bean's AC400 touchless clamps, the clamps only touch the tire. Fast and easy to use, the AC400 clamping system provides secure clamping without touching the rim. This patented technology allows accurate and repeatable results coupled with ease of use and durability with the capability to accommodate a full range of tire sizes.

Ensure your customer will tell you how well their vehicle drives after their wheel alignment, not about the scuffs on their wheels.
