

## Splash!! How to clean swimming-pool areas?

There is water everywhere. Your guests are walking around the swimming-pool area either barefoot or wearing flip-flops. In both cases, they will be carrying unseen impurities beneath their feet. Actually, it does not matter what they are wearing, because since the very second their feet touch those innocent drops of clean pool water, lying beside the deck chairs, things can get pretty dirty. Those initially crystal clear H<sub>2</sub>O particles turn suddenly into a dreadful filthy mess, every time another guest steps on it, the problem gets worse. Add some sunscreen, food residues and sweat to this soup, you practically have the worst kind of contamination a swimming-pool deck could possibly endure during a warm summer day.

Kärcher scrubber driers are a perfect match for the daily cleaning of wet areas.

### BR 30/4 C

As easy to use as an upright vacuum cleaner, the BR 30/4 thoroughly cleans and dries floors in a single pass.

#### No sweat:

The brush can be replaced and/or washed without tools

#### Fresh water:

The water compartment can be easily refilled by simply detaching the tank

#### Micro cleaning:

The optional micro fibre brush is washable and offers outstanding cleaning properties

### BR 40/10 C

Flexible scrubber especially developed for surfaces sized 1000-4000 sq. ft

#### Mobile pool:

The water compartment can be easily transported and refilled even in low wash basins

#### Under pressure:

Deep cleaning with a higher brush contact pressure in the Advanced version.

#### Clean between the lines:

Medium hard brush, for cleaning strong structured floors and deeper joints—grout lines.

#### Get rid of the Mop:

One great benefit included with these scrubber driers is the separation between fresh and waste water.
